

illumitask Configuration and Learn Workshop Overview

This one-day workshop develops internal subject matter experts in administration for the illumitask SUITE. This highly interactive workshop employs real-world examples to illustrate how the SUITE supports the Advanced Error Reduction in Organizations (AERO) methodology.

The illumitask field workshop should be completed prior to undertaking this workshop. This hands-on workshop is designed for participants to:

- Understand the purpose and benefit of the configuration and learn modules
- Establish proficiency in supporting illumitask SUITE users in their respective organizations

This workshop includes the following topics:

- BRIEF High-Risk Task of the Day
- Triggers & Traps
- Performance Modes
- Lessons
- VIEW dashboard configuration
 - lists,
 - documents,
 - content pack,
 - distribution,
 - learn: review & publish
